Assignment 1: Getting Started with Bootstrap

Objective:
Use Bootstrap to create and style common UI components: a table and a card.

Task 1: Create a Table of Students

1. Use the Bootstrap **table** component to create a responsive and visually appealing table.
2. The table should include the following columns:
   - **Roll Number**
   - **Name**
   - **Grade**
   - **Email**
3. Style the table using appropriate Bootstrap classes like `table`, `table-striped`, and `table-hover` for better readability.

Task 2: Create a Card to Display Product Information

1. Use the Bootstrap **card** component to display details about a product.
2. The card should include:
   - A **product image** at the top.
   - The **product name** as a title.
   - A **short description** of the product.
   - A **price** section.
   - A **button** to add the product to the cart.
